OIL IN SUMPTER COUNTY.

It seems that the oil fever has struck Sumpterville, as the following telegram to the Times-Union and Citizen will show:

The good news is current upon the treets here today that the Pearson Oil Company has been successful in finding oil in the well, two and a half miles south of Sumtervile. The whis-tles were blowing last night for an hour or so, heralding the glad tidings, and a man from near the well was in

town this morning with the news. The Pearson company deserves the success which it is said is theirs. They have spent a large amount of money in putting down this well, and it has reached the depth of nearly two thousand feet. From what we can under-stand the oil has not come in a gusher, but will have to be pumped. This, however, does not lessen the value of the well at all, as we are informed nearly all wells sooner or later reach that stage where the oil is pumped, prevails here, and the people are ready to congratulate the Pearson people, who have been very nice towards the citizens in the way of buying options, etc. The company has at all times been fair and open in its
